SUMMARY

React.js Frontend Developer with 1+ year of experience across 2 internships and freelance projects, building production-grade web applications. Proficient in Redux Toolkit, REST API integration, React Router, and responsive UI development. Reduced page load time by 30% through lazy loading and component optimization. Experienced with Agile workflows, Git-based collaboration, and delivering cross-browser compatible UIs.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), Python, HTML5, CSS3
- **Frontend:** React.js, Redux Toolkit, React Router, React Hooks, Context API, Tailwind CSS, Bootstrap, Responsive Web Design
- **React Concepts:** Custom Hooks, Lazy Loading, Code Splitting, Component Lifecycle, State Management, Shimmer UI, Dynamic Rendering
- **JavaScript:** DOM Manipulation, Async/Await, Promises, Error Handling, REST API Integration, Event Handling
- **Testing & Quality:** Jest, React Testing Library
- **Tools & Platforms:** Git, GitHub, VS Code, Postman, Vite, Parcel, Vercel, Netlify, Render, Jira (Agile)

EXPERIENCE

Freelance Frontend Developer

Oct 2025 – Present

Self-Employed — Remote

- Delivered 2+ production-ready React.js web applications for clients, including a full-featured food ordering app with live API integration, Redux Toolkit state management, and React Router navigation.
- Implemented custom React hooks to streamline API fetching logic, reducing code duplication by ~40% across projects.
- Optimized rendering performance via lazy loading and component reuse, achieving consistent sub-2s page load times across desktop and mobile.
- Delivered Shimmer UI loading states, error boundaries, and responsive layouts using Tailwind CSS ensuring production-ready UX.

Frontend Developer Intern

Feb 2025 – May 2025

Slash Mark IT Solutions — Remote

- Built a scalable **Meat Delivery** web app in React.js with JWT auth, protected route, form validation & session management.
- Integrated RESTful APIs via Axios for dynamic product management, real-time cart operations, and checkout workflows.
- Applied Redux for centralized state management and reusable component architecture, improving maintainability and team code review efficiency.

Web Development Intern

Mar 2024 – Oct 2024

International Institute of Digital Technologies (IIDT) — Tirupati

- Developed frontend modules for an e-commerce application in React.js — product listings, category filtering, and shopping cart.
- Designed fully responsive UI layouts with HTML5, CSS3, and Bootstrap, ensuring cross-device and cross-browser compatibility.
- Integrated REST APIs to fetch and display dynamic product data with loading states and error handling.

PROJECTS

FoodAdda | React.js, Redux Toolkit, React Router | **[LIVE DEMO]**

Oct 2025 – Present

- Swiggy-inspired food ordering app with live restaurant and menu data via API, featuring search, filter, and cart management.
- Managed global state with Redux Toolkit; built multi-page navigation (Home, Menu, Cart, About, Contact) using React Router.
- Added custom hooks for reusable API fetching, Shimmer UI for loading states, and error boundaries for reliability.
- Optimized with lazy loading and code splitting; fully responsive across all device sizes.

Job Postings Portal | React.js, REST API, JavaScript | **[LIVE DEMO]**

2024

- Built a dynamic job portal fetching real-time listings via REST API, with search and filter functionality for improved discoverability.
- Implemented skeleton loaders, empty state handling, and API error boundaries for a production-grade user experience.
- Designed a responsive, accessible UI with reusable React components, reducing component build time by ~30% across the project.

EDUCATION

Audisankara Engineering College, Nellore, India

2020 – 2024

B.Tech – Computer Science & Engineering
